Here is the updated and managed version of your spreadsheet. I processed the data as follows:

- **Removed 2025 programs**: I filtered out any entries with deadlines in 2025 (or earlier), as these are no longer upcoming based on the current date (January 20, 2026). This includes specific dates like October 19, 2025, October 31, 2025, and December 2025 (treated as December 31, 2025, for sorting purposes).
- **Sorted by upcoming programs**: I sorted the remaining entries by deadline in ascending order (earliest upcoming first). "Rolling" or ongoing applications (e.g., "Currently Open" or "Throughout 2026") are treated as future/open and placed at the end.
- **Other management**: Reset the S.No column for the new list. Kept all other columns intact for completeness. Only upcoming programs (deadlines on or after January 20, 2026) are included.

If any deadlines need manual adjustment or if you meant something different by "2025 programs" (e.g., based on start year vs. application year), let me know for refinements.
